WX9137C

Maturity 3.7

We have had excellent results with 9137C. It has great phytophthora field tolerance and a good lodging score which makes this a good choice for all soil types. This clear hilum conventional can be planted in 15" or 30" rows. A very versatile conventional.

WX9542NC

Maturity 4.2

Excellent early 4 that has been very consistent. This bean looks fantastic this year with several 4-bean pods on every plant. Tends to shine on your better soils.

WX9447NC

Maturity 4.7

An excellent yielding conventional bean. Works well across all soil types. Has good height and good standability. This bean has consistently been in the top yielders.

WX9348NC

Maturity 4.8

This is a medium bush plant that doesn't need to be planted too thick. Excellent disease package with great yield potential. Works good on those tough soils.

WX9950NC

Maturity 5.0

Very versatile bean. Will yield under stressful conditions, but also has a lot of top-end yield. This is a tall bean that will yield in the bottoms or on the hill.

Good Products • Good Prices • Good Service

As each year brings a new set of challenges, our goal is *your* success. We evaluate the potential of soybean technologies to ensure you are getting maximum value and tailored profitability within your fields. Our trusted advisors can help identify products and forward-thinking strategies to give you a solid growing season. We value your patronage and look forward to partnering with you. Thank you for choosing Willcross.
