TB Tight Bottom  
 TU Thin Upland  
 GB Good Bottom

I Irrigated  
 GU Good Upland  
 VT Very Thin

NR Not Rated  
 Y Yes  
 N No

## WXR7398N

Maturity 3.9

This is one tough bean to beat. 7398 is a great bottom bean, but can also handle the stress. Very pleased with how this bean continues to yield year after year.

## WXR7409N

Maturity 4.0

This bean can handle variable soils. Looks really good in the bottoms, but it can handle the hill ground too. 7409 continues to yield.

## WXR7418NS

Maturity 4.0

A taller plant that needs to be on narrow rows and goes across all soil types.

## WXR7428NS

Maturity 4.2

This bean has a quick emergence that can be planted early. It is a medium tall plant that requires narrow rows and works on all soil types.

## WXR7878NS

Maturity 4.8

A bean that continues to yield! It can handle some of those tougher soils, but yields on your good ground too. Little more of an upright bean for those narrower rows.

As each year brings a new set of challenges, our goal is *your* success. We evaluate the potential of soybean technologies to ensure you are getting maximum value and tailored profitability within your fields. Our trusted advisors can help identify products and forward-thinking strategies to give you a solid growing season. We value your patronage and look forward to partnering with you. Thank you for choosing Willcross.
